

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Ministry of Culture and Tourism	Antalya

Antalya Museum is one of the most important cultural centres of Antalya. Founded in 1922, the museum exhibits artefacts brought from the Lycian, Pamphylia and Pisidian regions. The museum's collection includes sculptures, mosaics, sarcophagi and other archaeological finds. The museum, which draws attention especially with its sculpture collection from the Roman period, reveals the rich history of Antalya. The museum was awarded the "Museum of the Year" award by the Council of Europe in 1988.
