

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

SUMELA MONASTERY

- Renewal of Energy and Security Infrastructure
- Discovery and Installation of Security Cameras
- Turnstile Access Systems
- Information Screens
- Installation of Box Office Equipment
- Installation of Cabinet Systems

Proje
Ministry of Culture and Tourism

Yer
Maçka / Trabzon

Sümela Monastery is located in the foothills of Karadağ in the Maçka district of Trabzon. Built in the 4th century, the monastery was built on a steep slope 1150 metres above sea level. The monastery is famous for its magnificent frescoes and natural beauties. Abandoned in 1923, Sumela was restored in 1987 and opened to tourism in 2010. In addition to being an important pilgrimage centre especially for Christians, the monastery is also a fascinating place to visit for tourists.
