

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Şehitkamil / Gaziantep

The Zeugma Mosaic Museum is located in Gaziantep and is one of the largest mosaic museums in the world. The museum contains mosaics and frescoes from the Roman period. The mosaics excavated from the ancient city of Zeugma are the most remarkable works of the museum. Among these mosaics is the mosaic known as "Gypsy Girl". Opened in 2005, the museum offers its visitors the opportunity to get to know the ancient Roman art and culture closely with its rich collection.
