

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

GALATA TOWER

- Facade and Landscape Lighting
- Renewal of Energy and Security Infrastructure

Proje
Ministry of Culture and Tourism

Yer
Galata Kulesi / İstanbul

The Galata Tower is located in the Galata neighbourhood of Istanbul and was built by the Genoese in the 14th century. The 66.9 metre high tower is one of the oldest and most iconic buildings in Istanbul. Offering visitors a magnificent view of Istanbul, Galata Tower is an important part of the city's historical and cultural heritage. The tower is also famous for Hazerfen Ahmet Çelebi's attempted flight from the Galata Tower to Üsküdar in the 17th century.
