

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Ministry of Culture and Tourism

Yer
Side / Antalya

Side Museum is located in the Manavgat district of Antalya, among the ruins of the ancient city of Side. The museum was established by restoring the ancient building known as the Roman Bath and exhibits many artefacts such as statues, sarcophagi, columns and inscriptions extracted from the ancient city. Side was an important harbour city throughout the ancient period and showed a great development during the Roman Empire. Side Museum offers visitors the rich cultural heritage of the ancient period.
