YEREL DEĞERLER KÜRESEL GELECEK

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Istanbul Archaeological Museum is the first museum of Turkey, founded by Osman Hamdi Bey in 1891. The museum consists of three main units: the Museum of Ancient Oriental Art, the Archaeological Museum and the Tiled Pavilion Museum. Its collection includes many important artefacts from antiquity, including the Sarcophagus of Alexander, the Sarcophagus of Weeping Women and the treasures of Troy. The Istanbul Archaeological Museum offers visitors a wide range of history and is filled with artefacts brought from all over the world.
