

Historical Artifacts / Ruins

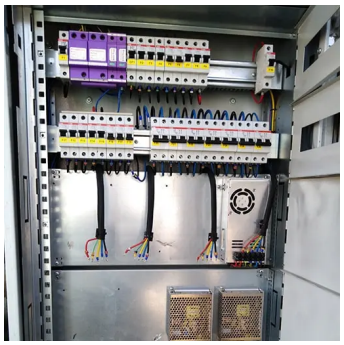

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

- Renewal of Energy and Security Infrastructure
- Discovery and Installation of Security Cameras
- Information Screens
- Installation of Box Office Equipment
- Installation of Cabinet Systems
- Electricity Contracting

Proje
Ministry of Culture and Tourism

Yer
Fatih / İstanbul

Kariye Mosque, formerly known as the Church of Khora, is located in the Edirnekapı neighbourhood of Istanbul. Built in the 6th century as a monastery church during the Byzantine period, the building is famous for its mosaic and fresco decorations made in the 14th century. Kariye Mosque, which was converted into a mosque during the Ottoman period and started to serve as a museum in 1945, started to be used as a mosque again in 2020. Its mosaics and frescoes are considered among the most beautiful examples of Byzantine art.
