

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

- Renewal of Energy and Security Infrastructure
- Discovery and Installation of Security Cameras
- Information Screens
- Installation of Box Office Equipment
- Installation of Cabinet Systems
- Electricity Contracting

Proje
Ministry of Culture and Tourism

Yer
Fatih / İstanbul

Hagia Irene is located in the courtyard of Topkapi Palace in the Sultanahmet neighbourhood of Istanbul. Built by the Byzantine Emperor Justinian I in the 6th century, it is one of the oldest churches in Istanbul. Hagia Irene, which was not converted into a mosque during the Ottoman period and used as an arms depot, today serves as a museum and concert venue. Hagia Irene, which attracts attention with its history and acoustics, offers a unique venue for classical music concerts and cultural events.
