

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

- Discovery and Installation of Security Cameras
- Turnstile Access Systems
- Information Screens
- Installation of Box Office Equipment
- Installation of Cabinet Systems
- Electricity Contracting

Proje
Ministry of Culture and Tourism

Yer
Fatih / İstanbul

Topkapi Palace is located on the historical peninsula of Istanbul and was built by Sultan Mehmet the Conqueror in the 15th century. For 400 years it was the administrative centre of the Ottoman Empire and the residence of the sultans. The palace complex consists of various pavilions, courtyards, harem and government offices. Converted in 1924 into a museum, Topkapi Palace is an important cultural venue where valuable artefacts, relics and treasures of the sultans from the Ottoman period are exhibited.
