

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

KONYA MEVLANA MUSEUM

- Renewal of Energy and Security Infrastructure
- Discovery and Installation of Security Cameras
- Turnstile Access Systems
- Information Screens
- Installation of Box Office Equipment
- Installation of Cabinet Systems

Mevlana Museum is located in Konya and is dedicated to the famous mystic and poet Mevlana Celaleddin Rumi. In 1926, Mevlana's tomb was converted into a museum and served as the centre of the Mevlevi order. The museum exhibits items used by Mevlana and his disciples, manuscripts and various works of art. Every year thousands of local and foreign tourists visit the museum to experience Mevlana's spiritual heritage.
