

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Proje
Ministry of Culture and Tourism

Yer
Bergama / İzmir

The Acropolis of Pergamon is located in the Bergama district of Izmir and is an ancient Greek settlement. Pergamon was one of the important cultural and scientific centres of the Hellenistic period. Structures such as the Altar of Zeus, the Temple of Athena and the Library of Pergamon in the Acropolis take visitors on a historical journey. The Acropolis of Pergamon is a UNESCO World Heritage Site.
