

Historical Artifacts / Ruins

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Bodrum Underwater Archaeological Museum is located in Bodrum Castle and was established in 1964. Turkey's first underwater archaeological museum, this place exhibits ancient shipwrecks and underwater finds. The museum's collection includes important artefacts such as Uluburun Shipwreck, one of the oldest shipwrecks in the world, Serçe Harbour Shipwreck and Eastern Roman Shipwreck. Bodrum Underwater Archaeological Museum offers visitors a unique insight into maritime history.
