

Historical Artifacts / Ruins

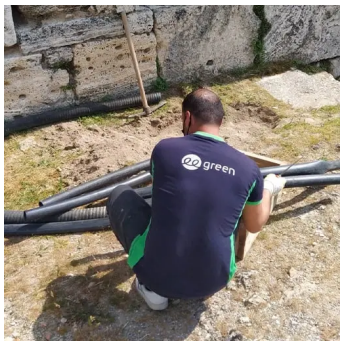

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Yer
Silifke / Mersin

Cennet Cehennem consists of two large pits located near Narlıkuyu in the Silifke district of Mersin. These pits were formed by the collapse of the ceilings of limestone caves formed by underground streams. The Cennet pit is 70 metres deep and 135 metres long, while the Cehennem pit is steeper and deeper, with a depth of 128 metres. These natural formations attract visitors with their mythological stories and magnificent views.
