

Historical Artifacts / Ruins

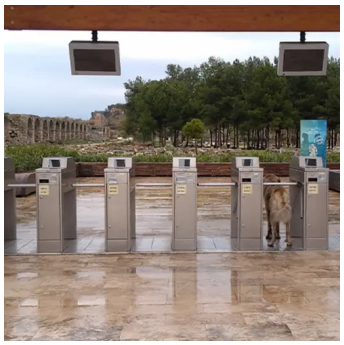

Our main goal in our electrical installation and lighting solutions for historical monuments and ruins is to protect and emphasize our cultural heritage. In these projects that require sensitivity, we keep energy efficiency and electrical safety standards at the highest level and use special technologies that will not harm the authenticity of the artifacts. With LED-based lighting systems and remotely monitored energy management systems, we protect the traces of history, enrich the visitor experience and minimize energy consumption.

Ministry of Culture and Tourism

Yer
Karadut / Adıyaman

Mount Nemrut is located in Adıyaman province, southeast of the Taurus Mountains. This 2150 metre high mountain is famous for its gigantic statues and burial mound built by Antiochos I, King of Commagene in 62 BC. Among these artefacts are the statue of Antiochos, lion and eagle statues. Mount Nemrut was included in the UNESCO World Heritage List in 1987 and is particularly popular with visitors to watch the sunrise and sunset.
